# Getting Started with Standalone PDF Viewer component

1 Jul 202410 minutes to read

This section explains the steps required to create a simple Standalone React PDF Viewer and demonstrates the basic usage of the PDF Viewer control in a React application.

## Prerequisites

To get started with Syncfusion React UI components, ensure the compatible version of React.

- React supported version  $\geq 15.5.4$  .
- Required node version  $\geq 14.0.0$  (NPM Package Manager).

## Setup for Local Development

1. Create a new React app [create-react-app](#) (<https://github.com/facebook/create-react-app>) and install it using the following command.

```
npm install -g create-react-app
```

1. To setup basic React sample use following commands.

JSX

TSX

```
create-react-app quickstart
cd quickstart
npm install
```
